To whom it may concern

Helen Baker was recommended to me to provide a driving force within the implementation of project management framework both internally and with QR customers.

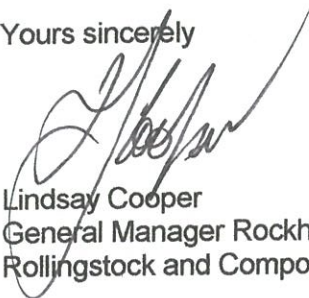

Helen during her engagement, not only achieved the above, but brought control to several multi-million dollar projects that had commenced prior to her arrival.

Helen involved herself in all areas of the business and was always keen to highlight areas of improvement and solutions to senior management.

Helen conducted herself in a very professional manner and demonstrated excellent people skills at all levels, and in some difficult industrially sensitive matters.

I would have no hesitation in recommending Helen for any role after being part of what she achieved during her contract with us.

Yours sincerely
